

When completing this assignment you are allowed to use the newest HTML and CSS standards.

Prerequisites

You need a basic understanding of HTML/CSS You need to be familiar with Git for your preferred OS.

What you need to do:

1. Reproduce what you see on the image `image.jpg` as HTML and CSS
2. Push your branch to your repository
3. Send us an email with a link to your repo on Github

Whats important:

- Dont worry about browser backwards compatibility
- Quality of HTML and CSS
- General Structure

Extra credit:

- How can we make links and buttons more interesting?
- Can we do something to visualize when an input box is active.
- How can we make sure a valid email and a password is entered, and what about errors?

Solve the assignment with as much effort as you see fit.

Happy coding.
